

Every one of these boxes is **drawn**. If you need words, they go inside little boxes with arrows between them, in the order things happen. Sentences running across the page do not count.

1**Adrenal cortex**

COMP

You should be able to: Match the three cortical zones to aldosterone, cortisol, and the adrenal androgens and state the primary action of each.

PROMPT ☐ A ☐ B PASS 1 COLOUR _____ PASS 2 COLOUR _____ ALSO A LAB SKILL

1 · DRAW IT

a picture, not a paragraph

2 · LABEL EVERY PART

lines out to the drawing

3 · WHAT HAPPENS, IN ORDER

boxes and arrows, step to step

4 · WHAT BREAKS IF THIS FAILS

follow the arrows to what stops

2**Pressure flow and resistance**

COMP

You should be able to: Apply the relationship among flow, pressure gradient, and resistance and predict the effect of a change in vessel radius, blood viscosity, or vessel length on flow.

PROMPT ☐ A ☐ B PASS 1 COLOUR _____ PASS 2 COLOUR _____ ALSO A LAB SKILL

1 · DRAW IT

a picture, not a paragraph

2 · LABEL EVERY PART

lines out to the drawing

3 · WHAT HAPPENS, IN ORDER

boxes and arrows, step to step

4 · WHAT BREAKS IF THIS FAILS

follow the arrows to what stops

Every one of these boxes is **drawn**. If you need words, they go inside little boxes with arrows between them, in the order things happen. Sentences running across the page do not count.

3**Vessel structure and function**

COMP

You should be able to: Match arteries, arterioles, capillaries, venules, and veins to their role in pressure buffering, resistance, exchange, and capacitance.

PROMPT ☐ A ☐ B PASS 1 COLOUR _____ PASS 2 COLOUR _____ ALSO A LAB SKILL

1 · DRAW IT

a picture, not a paragraph

2 · LABEL EVERY PART

lines out to the drawing

3 · WHAT HAPPENS, IN ORDER

boxes and arrows, step to step

4 · WHAT BREAKS IF THIS FAILS

follow the arrows to what stops

4**Arterial blood pressure**

COMP

You should be able to: Define systolic, diastolic, pulse, and mean arterial pressure, calculate mean arterial pressure, and explain how it is determined by cardiac output and total peripheral resistance.

PROMPT ☐ A ☐ B PASS 1 COLOUR _____ PASS 2 COLOUR _____ ALSO A LAB SKILL

1 · DRAW IT

a picture, not a paragraph

2 · LABEL EVERY PART

lines out to the drawing

3 · WHAT HAPPENS, IN ORDER

boxes and arrows, step to step

4 · WHAT BREAKS IF THIS FAILS

follow the arrows to what stops

Every one of these boxes is **drawn**. If you need words, they go inside little boxes with arrows between them, in the order things happen. Sentences running across the page do not count.

5**Local control of blood flow**

COMP

You should be able to: Explain myogenic, metabolic, and endothelial control of arteriolar tone and predict the local flow response to increased tissue metabolism.

PROMPT ☐ A ☐ B PASS 1 COLOUR _____ PASS 2 COLOUR _____

1 · DRAW IT

a picture, not a paragraph

2 · LABEL EVERY PART

lines out to the drawing

3 · WHAT HAPPENS, IN ORDER

boxes and arrows, step to step

4 · WHAT BREAKS IF THIS FAILS

follow the arrows to what stops

6**Capillary exchange and Starling forces**

COMP

You should be able to: Identify the four Starling forces at a capillary and determine the net direction of fluid movement at the arterial and venous ends.

PROMPT ☐ A ☐ B PASS 1 COLOUR _____ PASS 2 COLOUR _____

1 · DRAW IT

a picture, not a paragraph

2 · LABEL EVERY PART

lines out to the drawing

3 · WHAT HAPPENS, IN ORDER

boxes and arrows, step to step

4 · WHAT BREAKS IF THIS FAILS

follow the arrows to what stops

Every one of these boxes is **drawn**. If you need words, they go inside little boxes with arrows between them, in the order things happen. Sentences running across the page do not count.

7**Edema**

COMP

You should be able to: Explain how increased capillary hydrostatic pressure, reduced plasma protein, increased permeability, or lymphatic blockage each produce edema and match a clinical scenario to its mechanism.

PROMPT ☐ A ☐ B PASS 1 COLOUR _____ PASS 2 COLOUR _____

1 · DRAW IT

a picture, not a paragraph

2 · LABEL EVERY PART

lines out to the drawing

3 · WHAT HAPPENS, IN ORDER

boxes and arrows, step to step

4 · WHAT BREAKS IF THIS FAILS

follow the arrows to what stops

8**Venous return**

COMP

You should be able to: Explain the skeletal muscle pump, the respiratory pump, and venoconstriction and predict the effect of prolonged standing on venous return and stroke volume.

PROMPT ☐ A ☐ B PASS 1 COLOUR _____ PASS 2 COLOUR _____ ALSO A LAB SKILL

1 · DRAW IT

a picture, not a paragraph

2 · LABEL EVERY PART

lines out to the drawing

3 · WHAT HAPPENS, IN ORDER

boxes and arrows, step to step

4 · WHAT BREAKS IF THIS FAILS

follow the arrows to what stops

Every one of these boxes is **drawn**. If you need words, they go inside little boxes with arrows between them, in the order things happen. Sentences running across the page do not count.

9**Blood pressure measurement**

COMP

You should be able to: Measure blood pressure by auscultation, explain the origin of the Korotkoff sounds, and record the response to a postural or exercise challenge.

PROMPT ☐ A ☐ B PASS 1 COLOUR _____ PASS 2 COLOUR _____ ALSO A LAB SKILL

1 · DRAW IT

a picture, not a paragraph

2 · LABEL EVERY PART

lines out to the drawing

3 · WHAT HAPPENS, IN ORDER

boxes and arrows, step to step

4 · WHAT BREAKS IF THIS FAILS

follow the arrows to what stops

10**Baroreceptor reflex**

COMP

You should be able to: Trace the baroreceptor reflex from the carotid sinus and aortic arch through the medulla to the heart and vessels and state the response to a fall in blood pressure.

PROMPT ☐ A ☐ B PASS 1 COLOUR _____ PASS 2 COLOUR _____ ALSO A LAB SKILL

1 · DRAW IT

a picture, not a paragraph

2 · LABEL EVERY PART

lines out to the drawing

3 · WHAT HAPPENS, IN ORDER

boxes and arrows, step to step

4 · WHAT BREAKS IF THIS FAILS

follow the arrows to what stops

Every one of these boxes is **drawn**. If you need words, they go inside little boxes with arrows between them, in the order things happen. Sentences running across the page do not count.

11**Hormonal control of blood pressure**

COMP

You should be able to: Describe the roles of angiotensin II, aldosterone, antidiuretic hormone, and atrial natriuretic peptide in long term blood pressure control.

PROMPT ☐ A ☐ B PASS 1 COLOUR _____ PASS 2 COLOUR _____

1 · DRAW IT

a picture, not a paragraph

2 · LABEL EVERY PART

lines out to the drawing

3 · WHAT HAPPENS, IN ORDER

boxes and arrows, step to step

4 · WHAT BREAKS IF THIS FAILS

follow the arrows to what stops

12**Cardiovascular response to exercise**

COMP

You should be able to: Predict the change in heart rate, stroke volume, cardiac output, total peripheral resistance, and regional blood flow distribution during moderate exercise.

PROMPT ☐ A ☐ B PASS 1 COLOUR _____ PASS 2 COLOUR _____ ALSO A LAB SKILL

1 · DRAW IT

a picture, not a paragraph

2 · LABEL EVERY PART

lines out to the drawing

3 · WHAT HAPPENS, IN ORDER

boxes and arrows, step to step

4 · WHAT BREAKS IF THIS FAILS

follow the arrows to what stops

Every one of these boxes is **drawn**. If you need words, they go inside little boxes with arrows between them, in the order things happen. Sentences running across the page do not count.

13**Compensation in hemorrhage and shock**

COMP

You should be able to: Sequence the compensatory responses to blood loss and explain the point at which compensation fails.

PROMPT ☐ A ☐ B PASS 1 COLOUR _____ PASS 2 COLOUR _____

1 · DRAW IT

a picture, not a paragraph

2 · LABEL EVERY PART

lines out to the drawing

3 · WHAT HAPPENS, IN ORDER

boxes and arrows, step to step

4 · WHAT BREAKS IF THIS FAILS

follow the arrows to what stops

Pass 1 from the book, before the video. Pass 2 in the second colour, after it, in the same boxes.

Dr. Sharilyn Rennie
