

1

COMP

Neuromuscular junction

You should be able to: Trace transmission at the neuromuscular junction from the motor neuron action potential to the end plate potential and explain why every action potential in the motor neuron produces one in the muscle fiber.

PROMPT ☐ A ☐ B PASS 1 COLOUR _____ PASS 2 COLOUR _____ ALSO A LAB SKILL

Every one of these boxes is **drawn**. If you need words, they go inside little boxes with arrows between them, in the order things happen. Sentences running across the page do not count.

1 · DRAW IT*a picture, not a paragraph***2 · LABEL EVERY PART***lines out to the drawing***3 · WHAT HAPPENS, IN ORDER***boxes and arrows, step to step***4 · WHAT BREAKS IF THIS FAILS***follow the arrows to what stops*

2

Excitation contraction coupling

COMP

You should be able to: Trace excitation contraction coupling from the T tubule through the DHP and ryanodine receptors to calcium release from the sarcoplasmic reticulum.

PROMPT ☐ A ☐ B PASS 1 COLOUR _____ PASS 2 COLOUR _____ ALSO A LAB SKILL

Every one of these boxes is **drawn**. If you need words, they go inside little boxes with arrows between them, in the order things happen. Sentences running across the page do not count.

1 · DRAW IT*a picture, not a paragraph***2 · LABEL EVERY PART***lines out to the drawing***3 · WHAT HAPPENS, IN ORDER***boxes and arrows, step to step***4 · WHAT BREAKS IF THIS FAILS***follow the arrows to what stops*

3

Crossbridge cycle

COMP

You should be able to: Order the steps of the crossbridge cycle, binding, power stroke, detachment, and reactivation, and state where ATP binds and where it is hydrolyzed.

PROMPT ☐ A ☐ B PASS 1 COLOUR _____ PASS 2 COLOUR _____ ALSO A LAB SKILL

Every one of these boxes is **drawn**. If you need words, they go inside little boxes with arrows between them, in the order things happen. Sentences running across the page do not count.

1 · DRAW IT*a picture, not a paragraph***2 · LABEL EVERY PART***lines out to the drawing***3 · WHAT HAPPENS, IN ORDER***boxes and arrows, step to step***4 · WHAT BREAKS IF THIS FAILS***follow the arrows to what stops*

4

COMP

Calcium and the regulatory proteins

You should be able to: Explain how calcium binding to troponin moves tropomyosin off the myosin binding site and predict what happens to contraction if calcium cannot be released.

PROMPT ☐ A ☐ B PASS 1 COLOUR _____ PASS 2 COLOUR _____

Every one of these boxes is **drawn**. If you need words, they go inside little boxes with arrows between them, in the order things happen. Sentences running across the page do not count.

1 · DRAW IT*a picture, not a paragraph***2 · LABEL EVERY PART***lines out to the drawing***3 · WHAT HAPPENS, IN ORDER***boxes and arrows, step to step***4 · WHAT BREAKS IF THIS FAILS***follow the arrows to what stops*

5

COMP

Relaxation and calcium removal

You should be able to: Explain how SERCA and acetylcholinesterase end a contraction and predict the result if either one fails.

PROMPT ☐ A ☐ B PASS 1 COLOUR _____ PASS 2 COLOUR _____

Every one of these boxes is **drawn**. If you need words, they go inside little boxes with arrows between them, in the order things happen. Sentences running across the page do not count.

1 · DRAW IT*a picture, not a paragraph***2 · LABEL EVERY PART***lines out to the drawing***3 · WHAT HAPPENS, IN ORDER***boxes and arrows, step to step***4 · WHAT BREAKS IF THIS FAILS***follow the arrows to what stops*

6

COMP

The muscle twitch

You should be able to: Label the latent period, contraction phase, and relaxation phase on a twitch tracing and explain what limits each phase.

PROMPT ☐ A ☐ B PASS 1 COLOUR _____ PASS 2 COLOUR _____ ALSO A LAB SKILL

Every one of these boxes is **drawn**. If you need words, they go inside little boxes with arrows between them, in the order things happen. Sentences running across the page do not count.

1 · DRAW IT*a picture, not a paragraph***2 · LABEL EVERY PART***lines out to the drawing***3 · WHAT HAPPENS, IN ORDER***boxes and arrows, step to step***4 · WHAT BREAKS IF THIS FAILS***follow the arrows to what stops*

7

COMP

Summation and tetanus

You should be able to: Explain wave summation and distinguish unfused from fused tetanus by stimulus frequency and calcium accumulation.

PROMPT ☐ A ☐ B PASS 1 COLOUR _____ PASS 2 COLOUR _____ ALSO A LAB SKILL

Every one of these boxes is **drawn**. If you need words, they go inside little boxes with arrows between them, in the order things happen. Sentences running across the page do not count.

1 · DRAW IT*a picture, not a paragraph***2 · LABEL EVERY PART***lines out to the drawing***3 · WHAT HAPPENS, IN ORDER***boxes and arrows, step to step***4 · WHAT BREAKS IF THIS FAILS***follow the arrows to what stops*

8

COMP

Motor units and recruitment

You should be able to: Define the motor unit and explain how size of the unit and orderly recruitment grade the force a whole muscle produces.

PROMPT ☐ A ☐ B PASS 1 COLOUR _____ PASS 2 COLOUR _____ ALSO A LAB SKILL

Every one of these boxes is **drawn**. If you need words, they go inside little boxes with arrows between them, in the order things happen. Sentences running across the page do not count.

1 · DRAW IT*a picture, not a paragraph***2 · LABEL EVERY PART***lines out to the drawing***3 · WHAT HAPPENS, IN ORDER***boxes and arrows, step to step***4 · WHAT BREAKS IF THIS FAILS***follow the arrows to what stops*

9

Length tension relationship

COMP

You should be able to: Interpret a length tension curve and explain why tension falls at very short and very long sarcomere lengths.

PROMPT ☐ A ☐ B PASS 1 COLOUR _____ PASS 2 COLOUR _____ ALSO A LAB SKILL

Every one of these boxes is **drawn**. If you need words, they go inside little boxes with arrows between them, in the order things happen. Sentences running across the page do not count.

1 · DRAW IT*a picture, not a paragraph***2 · LABEL EVERY PART***lines out to the drawing***3 · WHAT HAPPENS, IN ORDER***boxes and arrows, step to step***4 · WHAT BREAKS IF THIS FAILS***follow the arrows to what stops*

10

COMP

Isometric and isotonic contraction

You should be able to: Distinguish isometric, concentric, and eccentric contractions and predict shortening velocity from the load applied.

PROMPT ☐ A ☐ B PASS 1 COLOUR _____ PASS 2 COLOUR _____ ALSO A LAB SKILL

Every one of these boxes is **drawn**. If you need words, they go inside little boxes with arrows between them, in the order things happen. Sentences running across the page do not count.

1 · DRAW IT*a picture, not a paragraph***2 · LABEL EVERY PART***lines out to the drawing***3 · WHAT HAPPENS, IN ORDER***boxes and arrows, step to step***4 · WHAT BREAKS IF THIS FAILS***follow the arrows to what stops*

11

COMP

Muscle fiber types

You should be able to: Compare slow oxidative, fast oxidative glycolytic, and fast glycolytic fibers by speed, ATP source, fatigue resistance, and typical task.

PROMPT ☐ A ☐ B PASS 1 COLOUR _____ PASS 2 COLOUR _____ ALSO A LAB SKILL

Every one of these boxes is **drawn**. If you need words, they go inside little boxes with arrows between them, in the order things happen. Sentences running across the page do not count.

1 · DRAW IT*a picture, not a paragraph***2 · LABEL EVERY PART***lines out to the drawing***3 · WHAT HAPPENS, IN ORDER***boxes and arrows, step to step***4 · WHAT BREAKS IF THIS FAILS***follow the arrows to what stops*

12

COMP

ATP sources during activity

You should be able to: Order creatine phosphate, anaerobic glycolysis, and oxidative phosphorylation by how quickly each supplies ATP and how long each can sustain it.

PROMPT ☐ A ☐ B PASS 1 COLOUR _____ PASS 2 COLOUR _____

Every one of these boxes is **drawn**. If you need words, they go inside little boxes with arrows between them, in the order things happen. Sentences running across the page do not count.

1 · DRAW IT*a picture, not a paragraph***2 · LABEL EVERY PART***lines out to the drawing***3 · WHAT HAPPENS, IN ORDER***boxes and arrows, step to step***4 · WHAT BREAKS IF THIS FAILS***follow the arrows to what stops*

13

COMP

Fatigue and oxygen debt

You should be able to: Distinguish central from peripheral fatigue and explain the metabolic basis of excess post exercise oxygen consumption.

PROMPT ☐ A ☐ B PASS 1 COLOUR _____ PASS 2 COLOUR _____ ALSO A LAB SKILL

Every one of these boxes is **drawn**. If you need words, they go inside little boxes with arrows between them, in the order things happen. Sentences running across the page do not count.

1 · DRAW IT*a picture, not a paragraph***2 · LABEL EVERY PART***lines out to the drawing***3 · WHAT HAPPENS, IN ORDER***boxes and arrows, step to step***4 · WHAT BREAKS IF THIS FAILS***follow the arrows to what stops*

14

COMP

Muscle plasticity

You should be able to: Predict the change in fiber size, capillary supply, and mitochondrial content produced by endurance training, resistance training, and disuse.

PROMPT ☐ A ☐ B PASS 1 COLOUR _____ PASS 2 COLOUR _____

Every one of these boxes is **drawn**. If you need words, they go inside little boxes with arrows between them, in the order things happen. Sentences running across the page do not count.

1 · DRAW IT*a picture, not a paragraph***2 · LABEL EVERY PART***lines out to the drawing***3 · WHAT HAPPENS, IN ORDER***boxes and arrows, step to step***4 · WHAT BREAKS IF THIS FAILS***follow the arrows to what stops*

15

COMP

Electromyography and grip fatigue

You should be able to: Record grip force and surface EMG over a sustained contraction and relate the decline in force to recruitment and fatigue.

PROMPT ☐ A ☐ B PASS 1 COLOUR _____ PASS 2 COLOUR _____ ALSO A LAB SKILL

Every one of these boxes is **drawn**. If you need words, they go inside little boxes with arrows between them, in the order things happen. Sentences running across the page do not count.

1 · DRAW IT*a picture, not a paragraph***2 · LABEL EVERY PART***lines out to the drawing***3 · WHAT HAPPENS, IN ORDER***boxes and arrows, step to step***4 · WHAT BREAKS IF THIS FAILS***follow the arrows to what stops*

16

COMP

Twitch and tetanus simulation

You should be able to: Generate twitch and tetanus tracings in a muscle simulation by varying stimulus voltage and frequency and identify threshold and maximal stimulus.

PROMPT ☐ A ☐ B PASS 1 COLOUR _____ PASS 2 COLOUR _____ ALSO A LAB SKILL

Every one of these boxes is **drawn**. If you need words, they go inside little boxes with arrows between them, in the order things happen. Sentences running across the page do not count.

1 · DRAW IT*a picture, not a paragraph***2 · LABEL EVERY PART***lines out to the drawing***3 · WHAT HAPPENS, IN ORDER***boxes and arrows, step to step***4 · WHAT BREAKS IF THIS FAILS***follow the arrows to what stops*

17

COMP

Smooth muscle contraction mechanism

You should be able to: Trace smooth muscle contraction through calcium entry and release to calmodulin and myosin light chain kinase and explain why the mechanism is slower and more economical than in skeletal muscle.

PROMPT ☐ A ☐ B PASS 1 COLOUR _____ PASS 2 COLOUR _____

Every one of these boxes is **drawn**. If you need words, they go inside little boxes with arrows between them, in the order things happen. Sentences running across the page do not count.

1 · DRAW IT*a picture, not a paragraph***2 · LABEL EVERY PART***lines out to the drawing***3 · WHAT HAPPENS, IN ORDER***boxes and arrows, step to step***4 · WHAT BREAKS IF THIS FAILS***follow the arrows to what stops*

18

COMP

Smooth muscle types and regulation

You should be able to: Compare single unit and multi unit smooth muscle and list the stimuli that alter smooth muscle tone including stretch and local chemical signals.

PROMPT ☐ A ☐ B PASS 1 COLOUR _____ PASS 2 COLOUR _____

Every one of these boxes is **drawn**. If you need words, they go inside little boxes with arrows between them, in the order things happen. Sentences running across the page do not count.

1 · DRAW IT*a picture, not a paragraph***2 · LABEL EVERY PART***lines out to the drawing***3 · WHAT HAPPENS, IN ORDER***boxes and arrows, step to step***4 · WHAT BREAKS IF THIS FAILS***follow the arrows to what stops*

19

COMP

Cardiac muscle properties

You should be able to: Explain how intercalated discs and gap junctions allow the myocardium to act as a functional syncytium and state why cardiac muscle cannot be tetanized.

PROMPT ☐ A ☐ B PASS 1 COLOUR _____ PASS 2 COLOUR _____ ALSO A LAB SKILL

Every one of these boxes is **drawn**. If you need words, they go inside little boxes with arrows between them, in the order things happen. Sentences running across the page do not count.

1 · DRAW IT

a picture, not a paragraph

2 · LABEL EVERY PART

lines out to the drawing

3 · WHAT HAPPENS, IN ORDER

boxes and arrows, step to step

4 · WHAT BREAKS IF THIS FAILS

follow the arrows to what stops

20

COMP

Comparison of the three muscle types

You should be able to: Build a comparison of skeletal, cardiac, and smooth muscle by calcium source, regulatory protein, control, and speed of contraction.

PROMPT ☐ A ☐ B PASS 1 COLOUR _____ PASS 2 COLOUR _____ ALSO A LAB SKILL

Every one of these boxes is **drawn**. If you need words, they go inside little boxes with arrows between them, in the order things happen. Sentences running across the page do not count.

1 · DRAW IT*a picture, not a paragraph***2 · LABEL EVERY PART***lines out to the drawing***3 · WHAT HAPPENS, IN ORDER***boxes and arrows, step to step***4 · WHAT BREAKS IF THIS FAILS***follow the arrows to what stops*
